

## CLAIMS

What is claimed is:

1. An aromatic apparatus, comprising:  
a plumbing fixture having a tubular component, said tubular component configured to carry a warm or hot fluid through said plumbing fixture; and

an aromatic component at least partially disposed around said tubular component, said aromatic component configured to emanate an aroma when said warm or hot fluid is carried through said tubular component.

2. The aromatic apparatus according to claim 1, wherein said fluid is a liquid.

3. The aromatic component according to claim 1, wherein said aromatic component substantially encircles said tubular component.

4. The aromatic apparatus according to claim 1, wherein said fixture is a shower head and said aromatic component is disposed inside said shower head.

5. The aromatic apparatus according to claim 4, wherein said shower head comprises a chamber, said shower head configured to substantially enclose said aromatic component in said chamber.

6. The aromatic apparatus according to claim 5, wherein said shower head comprises one or more openings in communication with said chamber to allow aroma to emanate from said shower head.

7. The aromatic apparatus according to claim 5, wherein said aromatic component is disposed on or around a tubular component disposed inside said chamber.

8. The aromatic apparatus according to claim 5, wherein said chamber is formed by a spray cap attached to a base.

9. The aromatic apparatus according to claim 5, wherein said shower head includes means for replacing or refilling said aromatic component in said chamber.

10. The aromatic apparatus according to claim 5, wherein said shower head further comprises an injection port in communication with said chamber.

11. The aromatic apparatus according to claim 1, wherein said fixture is a pipe.

12. The aromatic apparatus according to claim 11, wherein said aromatic component comprises closure means for securing said aromatic component to said pipe.

13. The aromatic apparatus according to claim 12 further comprising a clip member for securing said aromatic component to said pipe.

14. The aromatic apparatus according to claim 13, wherein said clip member is sized and configured to securely engage said pipe.

15. The aromatic apparatus according to claim 14, wherein said clip member has a frame with a pair of end members and one or more transverse members.

16. The aromatic apparatus according to claim 1, wherein said aromatic component is impregnated with a volatile fragrance.

17. An aromatic apparatus, comprising:  
a plumbing fixture having a tubular component, said tubular component configured to carry a warm or hot liquid through said plumbing fixture; and

an aromatic component at least partially disposed around said tubular component, said aromatic component impregnated with a volatile fragrance and configured to emanate an aroma when said warm or hot liquid is carried through said tubular component.

18. The aromatic apparatus according to claim 17, wherein said fixture is a shower head having a chamber therein, said aromatic component disposed inside said chamber.

19. The aromatic apparatus according to claim 17, wherein said fixture is a pipe.

20. The aromatic apparatus according to claim 19 further comprising a clip member for securing said aromatic component to said pipe, said clip member sized and configured to securely engage said pipe.
